AgriSciences

TROPICAL FORESTRY AND AGROFORESTRY

is a two-year M.Sc. programme taught in English. The programme offers an interdisciplinary approach to examining forest management, deforestation and agroforestry. Students also gain in-depth knowledge, professional skills and critical awareness of nature conservation, water resource management, rural extension services and ecological processes influencing the structure, composition and functioning of natural areas. A broad understanding of socio-economic factors related to development and poverty alleviation prepares students for work in the international development sector. FTA provides many opportunities to gain hands-on experience and practical skills through its projects around the world. Students are highly encouraged to develop their master's thesis in conjunction with one of these development projects or with a local institution, such as a botanical garden or research laboratory. Various areas of specialization prepare students for professional careers as project managers, product and quality control managers in the business sector (such as wood importers), researchers, professors and advisers to NGOs and governmental bodies. Graduates will also be qualified to pursue work abroad in the development cooperation sector and in international business operations. The diverse international student body at FTA brings a unique mix of opinions and perspectives into our classroom environment, creating an ideal atmosphere for peer-to-peer learning. Students graduate with the title „Inženýr“ - Ing. (M.Sc. equivalent)

ADDITIONAL KNOWLEDGE AND SKILLS OF GRADUATES:

- PROFESSIONAL COMMUNICATION AND PRESENTATION SKILLS
- APPLIED RESEARCH AND SCIENTIFIC METHODOLOGY
- LABORATORY RESEARCH PROCEDURES
- ANALYTICAL SKILLS REGARDING BIOLOGICAL, TECHNICAL AND SOCIAL PROCESSES
- APPLIED SKILLS FOR ENTERING THE JOB MARKET
